

# RICCA TERRA

## 2023 'SUNSET' PET NAT ROSÉ

### ---VARIETAL MIX---

Grenache 44%, Grenache Blanc 36% & Vermentino 20%

### ---REGION---

Riverland

### ---THE STORY---

As the golden rays of the sun caress the majestic Riverland cliffs, it creates a breathtaking tapestry of vibrant pink hues across the sky, just like the colour of this wine.

### ---THE STRATEGY BEHIND THE BLEND---

A combination of Grenache, Grenache Blanc & Vermentino creates a wine that is one-of-a-kind! One will first notice the light pink colour, a bit like a perfect sunset. The wine has gone through sedimentation, this is the effect of the secondary fermentation process that occurs in the bottle. It is harmless and is understood to be an aphrodisiac (that is a rumour to the best of our knowledge). The bead of bubbles are fine and the wine presents in a manner that is to be enjoyed with good friends.

### ---TECHNICAL STUFF---

No animal bi-products were used in the making of this wine, so it is vegan. When the wine ferments to complete dryness, meaning all the sugars from the grapes are converted to alcohol, a small addition of unfermented grape juice is added at the time of bottling. This unfermented juice begins and finishes its fermentation process in the bottle, which creates the bubbles/fizz in this wine.

The final step is very simple, that is applying the colourful label and sending the wine to our amazing customers.
